

CLAIMS:

I claim:

1           1. A speed reading system comprising:  
2           a plurality of printed sheets, each sheet having  
3           a vertically extending scan bar;  
4           a plurality of printed lines of indicia extending  
5           perpendicular to said scan bar and selected printed  
6           lines of indicia having a plurality of grouped scan  
7           words therein, each scan word being in a different  
8           type font and in a bolder and larger type than each  
9           non-scan word and each group of said grouped scan  
10          words being positioned with the first scan word in  
11          each group of scanned words in one line being  
12          adjacent said vertically extending scan bar;  
13          a plurality of scan line indicators located  
14          adjacent to the scan bar, and one scan line indicator  
15          being adjacent each scan line having at least one scan  
16          word therein, each said scan line indicator being  
17          indicative of a line having at least one scan word  
18          therein, and  
19          a second scan bar being placed parallel to the  
20          first scan bar on the other side of the scan line  
21          indicators.

1           2. The speed reading system in accordance with  
2           claim 1 in which each scan line indicator is a solid  
3           color square.

1           3. The speed reading system in accordance with  
2           claim 1 in which each scan line is less than 4 cm  
3           long.

1           4. The speed reading system in accordance with  
2 claim 3 in which each scan word is 2 points larger  
3 than non-scan words.
